## Golden Care Cleaning and Sealing

Natural stone is porous and will have a certain level of absorbency. Liquids and dirt can penetrate the surface and leave stains. By protecting and correctly maintaining the surface the majority of stains can be avoided, maintenance will be significantly reduced and the stones' beauty will be preserved for a longer period of time.

Our tables are sealed during manufacture but these seals do not last forever; we recommend re-sealing your table annually to maintain its beauty and colour. For day to day cleaning it is important to avoid abrasive materials such as scourers as these will remove the sealer that is there to protect the table top. Some household cleaners are acidic and will again eat away at the seal; please refer to the contents of any cleaning materials for further information on their acidity content.

Nasty spillages such as red wine and fruit juice are very acidic and can cause acid etching on the surface of our polished travertine tables. Cleaning off any spillages straight away is crucial and we would recommend the Golden Care Granite Cleaner for all of our natural stone topped tables.

We recommend using Golden Care Granite Protector for resealing your table, available from Europa Leisure.

- Seals Granite, Marble & Ashlar
- Makes surface repellent to dirt, water and moisture
- Water based and solvent free
- Non hazardous and eco friendly
